Professional Profile

Senior Java Backend Engineer with 6+ years of experience across fintech, LegalTech, telecom, and automotive — building backend services, internal platforms, and SaaS products from design to production. Deep background in Spring Boot, REST/gRPC APIs, PostgreSQL, Kubernetes, and CI/CD, with recent hands-on work in AI-assisted search using OpenSearch, Qdrant, and RAG flows.

Experience

Bell Integrator — Full-time | Remote (Serbia)
Senior Java Backend Engineer — *Dec 2025 – Present*

- Optimized large FNS file processing with chunked execution, bounded parallelism, and MinIO artifacts, reducing processing duration by approx. 30–40%.
- Implemented a Hazelcast-based distributed rate limiter for Kubernetes replicas, reducing burst risk against an external API and making timeout behavior diagnosable across pods.
- Participated in a platform-wide tech upgrade migrating all services from Java 11 to Java 17 and Spring Boot 2 to Spring Boot 3, including dependency updates and CVE remediation.

Fastact — Part-time | Remote (International)
Co-founder / Technical Lead — *Apr 2024 – Nov 2025*

- Built hybrid retrieval with OpenSearch BM25, Qdrant vector search, score fusion, and citation schema, maintaining citation coverage above approx. 85–90% on pilot scenarios.
- Implemented a reactive chat service with Spring WebFlux, SSE streaming, ReactiveMongo, and trace metadata to reduce unsupported AI answers in production.
- Delivered subscription and payment flows with YooKassa webhooks, reactive AI Chat, Prometheus/Grafana monitoring, and CI/CD while leading a 7-person team; project received a 1M RUB grant from the Innovation Promotion Foundation.

Comarch — Full-time | Remote (Poland)
Java Backend / QA Automation Engineer — *Jul 2022 – Mar 2024*

- Developed E2E scenarios for account lifecycle, subscriptions, charging, balance changes, and negative billing cases using controlled fixtures and explicit asynchronous waits.
- Designed *LogRunMan* as a Maven library for execution metadata, failure classification, flaky-rate analysis, and duration trends across regression suites.
- Improved Allure metadata, reason codes, and release summaries, reducing initial failure triage on regression runs by approx. 25–35%.

Vector Informatik — Full-time | Remote (Germany)
Java Backend Engineer — *Feb 2021 – Jun 2022*

- Implemented GitLab API collection flow with service-token authentication, explicit pagination, timeout handling, retryable/non-retryable error mapping, and continuation after single-project failures.
- Built normalized repository records and status flags for stale activity, missing owners, archived state, and enrichment failures without converting flags into governance decisions.
- Delivered repeatable CSV/Markdown reports with summary counters, unit tests, and documentation, reducing manual audit work for dozens of repositories from hours to minutes.

Dell Technologies — Full-time | Remote (Ireland)
Backend / Infrastructure Engineering Intern — *Feb 2020 – Jan 2021*

- Configured Prometheus scraping for CSI controller, node plugin, and sidecars, verifying target health, scrape errors, and component coverage across Kubernetes workloads.
- Built Grafana dashboards for provisioning latency, attach/detach operations, mount failures, and pod restarts, grouped by operation, component, and storage class.
- Documented first-response runbooks linking alerts to dashboard panels, Kubernetes events, and pod logs, reducing initial diagnosis from hours to tens of minutes.

Skills

Languages: Java, Python, TypeScript, SQL
Backend: Spring Boot 3, Spring WebFlux, gRPC, REST API, Kafka, Hibernate/JPA, Maven
Data: PostgreSQL, MongoDB, Redis, S3, OpenSearch, Qdrant
DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, Prometheus, Grafana, Nginx
Testing: JUnit 5, Mockito, Testcontainers, AssertJ
AI / Search: LangChain, RAG, Hugging Face, Claude, DeepSeek, ChatGPT, GitHub Copilot

Education

ITMO University
Master's Degree, Computer Science, GPA: 5.0/5.0 — *Sep 2024 – Jul 2026*

Courses: Spring Boot Web Development with Java (Coursera); Java Developer of High-Load Applications (VK Education)
